No.94/LM(B)/2/150

New Delhi, dated, 20.6.94

**The General Managers,
All Indian Railways**

Sub: Drinking water supply at stations.

Railways have confirmed on various occasions, that drinking water is available at all stations, including halt stations. Notwithstanding this, complaints regarding non-availability of drinking water and lack of maintenance of taps/handpumps, etc. at different stations are being received frequently from Members of Parliament.

It is, therefore, desired that Railways ensure that water supply arrangements are maintained properly and kept in proper working order and that a sufficient number of water trolleys are provided at stations wherever warranted.

Please acknowledge receipt and ensure compliance.
